

Vital Bon-Matt CDS 300

Cost-Effective, Instant Surface Stabilisation for Short-Term Applications

For efficient control of the finest mineral dust, the unique and completely natural polymer formulation of Vital Bon-Matt CDS 300 has been independently tested to deliver unrivalled results.

Uniquely designed to stabilise fine, light, and problematic mineral dust in high-wind and environmentally sensitive areas, Vital Bon-Matt CDS 300 is formulated as a completely natural polymer.

Vital Bon-Matt CDS 300 cures within hours and will not remobilise.

A certified non-hazardous formulation, Vital Bon-Matt CDS 300 has been proven to provide instant dust control and stabilisation in a wide range of applications such as:

- Stockpiles (coal, iron ore, bauxite)
- Excessive wind exposed stockpiles
- Train wagon coal veneering
- Hazardous substance isolation
- Short-term non-traffic broadacre
- Sub-base road stabilisation
- Short-term batters and embankments

Vital Chemical formulate, manufacture and provide
best value solutions focused on delivering
social, environmental and economic benefits.
