

VE Gro-Matt

THE
SOLUTION is
CLEAR!

The use of an appropriate matrix medium is essential for all revegetation and rehabilitation projects. VE Gro-Matt offers unique features which will ensure your project falls within budget with the quality results you expect.

In combination with Vital Chemical's nutrient infused Vital Bon-Matt products as tackifiers, the VE Gro-Matt bonded fibre matrix (BFM) creates ideal growing conditions. The result is the delivery of a premium nutrient composition in combination with VE Gro-Matt's unique water holding capabilities.

VE Gro-Matt employed together with Vital Bon-Matt nutrient infused products, provides immediate and superior erosion control whilst establishing a long-term and sustainable growth medium.

- 100% Australian made and owned
- Sourced from Australian timbers
- Heat treated wood fibres provide increased water holding capacity
- Holds up to 15 times its weight in water
- Promotes a sustainable growth environment
- Rapid seed germination for instant mitigation of erosion
- Evenly distributed ground cover
- Premium stabilisation and erosion control
- Bio-contaminant free

Vital Chemical's range of industry leading hydromulch solutions are manufactured from ethically and sustainably sourced materials, providing premium soil stabilisation and enhanced environmental outcomes.
