

Vital Bon-Matt Stonewall

Cost-effective, instant and sustainable surface stabilisation technology for agricultural applications.

Vital Bon-Matt Stonewall has been independently tested to provide the highest levels of soil stabilisation and dust control to minimise sediment loss.

Vital Chemical's renowned polymer technology provides instant stabilisation in a wide range of agricultural applications.

- Quick and Easy to Apply
- Cost effective and practical
- Minimise erosion
- Minimise loss of sediment and nutrients
- Maintain soil moisture
- Instant 85% ground cover*
- Reduces dust and erosion
- Cures in hours and will not remobilise
- Certified as non-hazardous
- Significant water and time savings
- Versatility - Adjusting dilution, adjusts longevity

*Data referenced from "Assessment of Soil Stabilisation Compounds - Final Report", June 2013, SEEC & Landloch et al.

Vital Chemical formulate, manufacture and provide
best value solutions focused on delivering
social, environmental and economic benefits.
