

Vital Bon-Matt Stonewall Plus

Highly Effective Formulation for Stabilisation and Revegetation

A polymer based emulsion stabiliser with organic nutrient additives designed for soil stabilisation and revegetation in one single formulation.

Vital Bon-Matt Stonewall Plus has been designed for applications over numerous surfaces where strong, durable and flexible surface conditions and nutrient availability is required.

Vital Bon-Matt Stonewall Plus is a concentrated liquid emulsion which is diluted with water into solution prior to application to create a nutrient rich, long-term binding and surface sealant.

- Highly effective dust abatement;
- High wind speed resistance;
- Highly effective erosion control and stabilisation;
- Long-term capping;
- A strong, durable and flexible veneer over the applied surface;
- Cost efficiency;
- Quick and easy to apply to any seeded area or in combination with seed as a hydroseed alternative;
- Incorporated fertiliser for improved revegetation;
- Increases moisture retention and reduced weed;
- Improved establishment;
- Cures in hours and will not remobilise;
- Biodegradable and environmentally safe with inert degradation products - Certified Non-Hazardous;
- No polyacrylamide resins (no PAMs – no neurotoxic effects).

Vital Chemical formulate, manufacture and provide
best value solutions focused on delivering
social, environmental and economic benefits.
