

Vital Bon-Matt HR

Proven Contaminated Site Management Solution

Vital Bon-Matt HR is a versatile heavy duty, long lasting, multipurpose product for soil stabilisation and contamination isolation.

- **Independently tested and proven to isolate asbestos fibres and ACM in soil.**
- **Non-hazardous, environmentally sound formulation.**
- **A recognised and Approved** containment and isolation methodology.
- **Product Efficiently Applied** from a distance, providing increased safety.
- **Cost-Effective, Immediate Isolation** minimises risk and reduces ongoing monitoring and management costs.
- **Compliant** with safety, health and environmental regulations. Minimises risk and further potential discharge.
- **Enables Safe Contamination Removal** minimising further contamination.
- **Soil Stabilisation** minimises dust, erosion and stormwater run-off.
- **Rainfast** once applied will not remobilise.
- **Versatile**, providing short to medium term options and flexibility.

Vital Bon-Matt HR binds and covers asbestos fibres and other contaminants by adhering to surfaces and isolating them whilst penetrating the soil or surface profile. The resulting strong and flexible surface barrier minimises fugitive dust and other contaminant particulate discharges.

The bound surface assists in effectively reducing water permeability, reducing the risk of higher levels of contaminant generation and mobilisation. Minimising contaminated waste volume costs ensure a cost effective solution.

Now available in a Ready to Use formulation!

**Vital
Chemical**

Vital Chemical is leading the way in the research, development, formulation and supply of science-based solutions proven to support environmental compliance, reduce operational costs and achieve sustainable outcomes through the project lifetime.

EROSION CONTROL

- Short, medium and long term solutions
- Superior ground stabilisation
- Cures within hours, mitigating remobilisation from high impact weather events

DUST SUPPRESSION

- Short, medium and long term solutions
- Sustainable dust management for unsealed and high trafficked surfaces
- Cost effective products proven to reduce water cart usage

REVEGETATION

- Sustainably sourced solutions for a range of application requirements
- Enhanced moisture retention capabilities providing cost efficiencies
- Carbon rich varieties to restore and regenerate nutrient depleted soils

WATER TREATMENT

- End-to-end water treatment solutions
- Easy to apply flocculants, coagulating agents and dosing systems
- Cost efficient and workplace safe products to optimise site operations

THICKENING AGENT

- Organic thickening and binding properties turning slurries into manageable solids
- High liquid absorption rate reducing moisture levels
- Fully biodegradable properties ensuring best possible outcomes for the environment
