

Vital Track Bind

Providing instant dust control and effective stabilisation in a wide range of recreational track applications.

Vital Track Bind stabilises a broad range of soil types to prevent erosion from natural weather events and the wear and tear of bike and foot traffic. With its environmentally sound formulation and strong surface binding ability, this product is suitable for sensitive ecosystems. Vital Track Bind's ability to dry efficiently and not remobilise with wet weather events, makes it the ideal stabilising product for harsh Australian environmental conditions.

- Easy to apply
- Environmentally sound
- Long lasting and durable
- Easy maintenance

Incorporating Vital Chemical's Vital Bon-Matt HR dust suppression technology, Vital Track Bind is proven to provide instant dust control and stabilisation in a wide range of applications.

Vital Chemical is leading the way in the research, development, formulation and supply of science-based solutions proven to support environmental compliance, reduce operational costs and achieve sustainable outcomes through the project lifetime.

EROSION CONTROL

- Short, medium and long term solutions
- Superior ground stabilisation
- Cures within hours, mitigating remobilisation from high impact weather events

DUST SUPPRESSION

- Short, medium and long term solutions
- Sustainable dust management for unsealed and high trafficked surfaces
- Cost effective products proven to reduce water cart usage

REVEGETATION

- Sustainably sourced solutions for a range of application requirements
- Enhanced moisture retention capabilities providing cost efficiencies
- Carbon rich varieties to restore and regenerate nutrient depleted soils

WATER TREATMENT

- End-to-end water treatment solutions
- Easy to apply flocculants, coagulating agents and dosing systems
- Cost efficient and workplace safe products to optimise site operations

THICKENING AGENT

- Organic thickening and binding properties turning slurries into manageable solids
- High liquid absorption rate reducing moisture levels
- Fully biodegradable properties ensuring best possible outcomes for the environment
